Friends appreciate the generous assistance with identification and scientific naming of the more difficult species.

*Our thanks go to **Neville Walsh, National Herbarium; Dr Ken Walker, Museum Victoria; Gary Backhouse, Orchids; and Peter Marriot and Mike Halsey for moths.** Note that as fungi ID is rather complicated and most species are only partially named. Assistance with identification is provided by **Dr Graeme Ambrose** and is greatly appreciated. Here is a 4mb pdf document on [Lichens of Western Victoria](#)*
